

The Vision and Mission of NEPAC

NEPAC is a development-based non-profit, formed and led by the people in LaMare and Terre-Salei, to expand on education, health, agriculture, religion and social assistance without political affiliation.

The vision of NEPAC (Nouvel Espoir pour le Progrès et l'Avancement des Communautés) is that of a world in which all people/farmers can dance freely at their full capacity in societies that respect the rule of law and the dignity of people.

Mission: NEPAC strives to bring about improvements in the quality of life for disadvantaged people/farmers in marginalized developing communities through a process that unites people of different ideas and gives meaning and value to their lives.

Nou Hope has been walking alongside the people, carrying out its mission to embrace the hope of Christ as we love, learn, and work together. *Today, we see the community raising up to invest themselves to improve the greater community!*

NEPAC aims to achieve its objectives within the framework of a set of fields and principles which are: education, health, agriculture, and social assistance. NEPAC represents one of the largest local inter-organizational socio-economic cooperations aiming to intervene in the immediate 19 localities of the LaMare / Terre-Salei, under the supervision of the national executive council and the national technical council made up of executives from the organizational community with knowledge in integrated development.
